

# HORIZONTAL-MOUNT POLYPROPYLENE FLOAT SWITCH

MODEL NUMBER: YFL6905-100

## FEATURES & FUNCTIONS

- For low-cost automatic control applications, these switches are molded of FDA materials that are corrosion-resistant and impart no taste to food.
- When the float is moved toward the switch housing, it "clicks" on. When moved away, it "clicks" off.
- It can be installed through a bulkhead hole (0.562" clearance) from the "outside in" or from the "inside out."
- It will switch small solenoid valves and relays up to 0.080A (120VAC).
- Can be mounted directly through the tank sidewall or into the tank fitting.
- Simply rotate 180° for either "normally closed" or "normally open" operation.
