

## PENTEK® ECP SERIES PLEATED CELLULOSE POLYESTER CARTRIDGES

HIGHER WET STRENGTH THAN REGULAR CELLULOSE CARTRIDGES

Pentair® Pentek® ECP Series Cartridges are manufactured from a special formulation of resin-impregnated cellulose and polyester fibers.

This unique blend of materials provides a higher wet strength than regular cellulose cartridges. It also provides high flow rates and dirt-holding capacity, while maintaining extremely low pressure drop.

The media is pleated around a polypropylene core for added strength. The pleated end caps of the standard cartridges are immersed in a thermo-setting vinyl plastisol. The Big Blue® cartridges have a molded end cap with gaskets. The pleated ends are sealed to the endcap with a thermoplastic adhesive. The overlap seam is sonically welded to reduce internal bypass, improving filtration efficiency.

ECP Series Cartridge end caps feature a color-coding system for easy identification of micron ratings: tan (1 micron), white (5 micron), blue (20 micron), yellow (50 micron).

ECP Series Cartridges contain more media surface area than most competitive cartridges. The Standard 10" ECP cartridge contains 6 ft.<sup>2</sup> of media, where most cartridges contain only 4.5 ft.<sup>2</sup>. Other available ECP cartridge sizes contain the following amount of media:

- Standard 10" cartridge: 6 ft<sup>2</sup>
- Standard 20" cartridge: 12 ft<sup>2</sup>
- BB 10" cartridge: 18 ft<sup>2</sup>
- BB 20" cartridge: 36 ft<sup>2</sup>

### FEATURES/BENEFITS

Replaces Pentek CP and HFPC Series Cartridges

Minimal unloading and media migration

Special formulation of resin-impregnated cellulose and polyester fibers

Nominal 1, 5, 20, 50 micron rating  
Lengths: 10", 20"

Provides higher wet strength than regular cellulose cartridges

### SPECIFICATIONS

Filter Media – Cellulose polyester

Core – Polypropylene

Standard End Caps – Vinyl plastisol

Temperature Rating –

Big Blue End Caps – Polypropylene

40-125°F (4.4-51.7°C)
