

Windsor HI-Profile

The Windsor HI-Profile (HP) series cabinets feature a blow molded cabinet and a one piece injection molded cover designed to accommodate a majority of today's control valves. Available in three sizes, the cabinets are designed to fit 18", 24" or 35" tall mineral tanks without a base.

Their unique design makes the Windsor HP series easy to assemble, reducing labor costs. The cabinet body features a molded push-up that holds the bottom of the mineral tank in place without the need for a retaining plate. The molded cabinet top allows the neck of the mineral tank to snap into place, securing it for shipment.

The large salt port opening allows easy filling of rock or block salt. The blow molded

salt port lid has an integrated handle for a sure grip.

Cabinets are available in almond or white with black, brown or light blue covers. An optional injection molded grid is available.

Optional Injection Molded Grid

Please specify mineral tank and brine well diameter size when ordering.

Windsor HP-18 Cabinet

ORDER NUMBER	DESCRIPTION
G2726HP	Windsor HP-18 Almond/Brown Cover
G2726HP-01	Windsor HP-18 Almond/Black Cover
