

AMI Micropure Ultrafiltration Water Treatment for Washroom Sink

Provides Reliable Rejection of Microbes and Viruses, Making Water Safe for Brushing Your Teeth & Washing Your Face.

Microorganisms in tap water can make you sick if they get into your mouth while washing. The all-new AMI Micropure Ultrafilter is designed to provide you and your family with safe, clean water from the washroom tap. AMI Micropure is a point-of-use UF water treatment solution intended for installation beneath a washroom sink to reliably reject virus

and microorganisms from water - making it safe to use for brushing your teeth, washing your face, and other grooming needs. Its sleek and compact design mounts to the wall and takes up little space beneath your cabinet. Complete with quick-connect fittings and tubing needed to install with just two quick connections into most standard sink configurations.

Safe & Clean Water for Grooming & Bathing
